

AI PM who can build the product and operate the system.

Berkeley Haas MBA, May 2026. Ex-PayPal AI observability. BCP/Credicorp fintech scale. Builder of Trackly across web, iOS, macOS, CLI, and MCP.

TARGET ROLES

AI PM, Technical PM, platform PM, founder-adjacent PM

LOCATION

Bay Area

WORK AUTHORIZATION

Eligible for up to 3 years OPT/STEM OPT. No sponsorship needed for next role.

Hiring thesis

Kevin is strongest where product work has to be technical and operational: AI agents, observability, fintech, marketplace/recruiting infrastructure, and developer or productivity workflows. The pattern across his work is turning complex systems into products people can actually use.

Proof points

Trackly

Real-time job-search agent across web, iOS, macOS, CLI, and MCP. 1,900+ companies and 128,975+ roles shown publicly. [Case](#)

PayPal Checkout

Technical PM internship building AI observability tooling across 15+ checkout systems, with 75% faster issue detection in the project workflow. [Case](#)

BCP / Credicorp

Digital-first fintech products tied to 100K+ SMBs and underserved customers plus a \$620M ARR/P&L portfolio. [Case](#)

Agentic workflows

Public GitHub work across MCP, CLI, LLM observability, evaluation loops, and AI-assisted shipping systems. [Case](#)

Public-safe guardrails

- PayPal details should stay at resume-approved level. No internal diagrams, logs, screenshots, or system names.
- \$100M PayPal language is a modeled or targeted opportunity, not an achieved impact claim.
- Trackly 500+ MAU is an internal snapshot. Public coverage claims should cite the live Trackly site.
- OPT/STEM OPT language is eligibility wording, not a legal guarantee.
